

Replacement Parts

We understand the importance of the fit, finish, performance, and quality of a replacement part. That is why every OEM part we supply reflects our passion for excellence.

The time to order critical parts is before they become critical

Let Reichel & Drews assist with parts planning for more productivity and less downtime.

The very nature of roofing material manufacturing – moving, sliding, cutting, rolling and stacking abrasive materials – causes equipment to wear. The challenge is to have precision replacement parts available when you need them.

A combination of planning and a reliable, cost-effective source for manufactured and commercial parts will keep your production lines running efficiently and increase uptime

Four precise reasons Reichel & Drews can support your parts needs:

1. Guaranteed performance

As the OEM of machinery in your plant, Reichel & Drews can assure that your replacement parts are an exact match for fit and function.

We keep a complete history for all Reichel & Drews and UIP machines so we can guarantee the proper material, machining and heat treating.

2. Great value

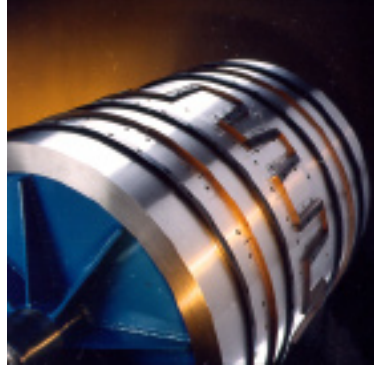

Our pricing is competitive and our quality is a winner; and we include the peace of mind that your part is manufactured to original specifications.

3. Timely delivery

Our commitment is to deliver your parts when you need them.

4. Reduce engineering time

Instead of reverse engineering, just tell us the part number or location of the part on your machines.

Information a click away

Critical parts and equipment information is available 24/7 on our Customer Gateway at www.reicheldrews.com. For your convenience, spare parts lists with a request for quote capability, spare parts and operating manuals, shipping history and a quote history are all accessible through this secure, password protected internet portal. Contact us to gain access to this great tool.

Control your future

Make & Hold Orders

Eliminate rush orders and downtime waiting for parts. Reichel & Drews offers a "Make & Hold" program in which we will manufacture and stock your critical parts to ensure availability when you need them.

- You will not be invoiced until you release them for shipment.
- For complete details, contact Sales or Customer Service.

Upgrades and Service

- One phone call will show you exactly what Reichel & Drews can deliver.
- Courtesy analysis to assess your production equipment needs.
- Information on a growing list of performance-enhancing upgrades.
- Full installation and start-up support.
- 24/7 telephone service support for installed equipment.
- Emergency breakdown service.
